Profile

I am Utku, a graduate of the Computer Programming program and currently continuing my studies in Management Information Systems (MIS). I have a strong interest in mobile application development and have been enhancing my skills by working on various projects in this field.

Education

Associate Degree, Computer Programming
İstanbul Arel Üniversitesi

Jan 2021 - Jan 2023

Employment

Student
Medipol Üniversitesi

BT Intern
İnnova Bilişim

Sep 2022 - Jun 2023

I worked as an IT Support Intern at Innova Bilişim Çözümleri for a total of one year, including 9 months of long-term and 3 months of short-term internship experience.

Projeler

FitApp – iOS Fitness App

Jun 2025 - Sep 2025

Comprehensive fitness application developed using SwiftUI & MVVM architecture. Features include user registration/login, water/calorie/step tracking, meal tracking, and task/todo modules. Dashboard providing personalized programs, articles, and motivational content. Weekly/monthly analysis screens (Swift Charts) for progress tracking. Scalable backend infrastructure with JWT token management and database integration.

BT Support

Request tracking system for IT departments in companies, developed in Kotlin with Firebase database support.
